Guidance of the Prophetic Sunnah on methods to invest and develop charitable work and its role in community reform

*Dr. Shehab Al-Din Mohamed Abou Zahw

Abstract

The Prophetic Sunnah has clearly given the spotlight on philanthropy, and has clearly demonstrated certain methods to develop, invest and employ it in the service of the community. This research -linking whenever possible to contemporary applications- included an introduction and three requirements.

The first requirement: introducing the charitable work, revealing all the authentic hadiths contained therein, and it consists of two demands.

The second requirement: the methods of investing and expanding charitable work in the Prophetic Sunnah, and it consists of nine demands.

The third requirement: a general analysis of the above-mentioned models in the Prophetic Sunnah to reveal the methods of charity and its impact on the development of society, which consists of five demands.

The problem of this research is that the development of fields of philanthropy requires searching for methods to invest and develop them, so that their bidding cycle expands, and covers the widest field possible. Hence came this research to answer several questions, the most prominent of these questions are:

- How to develop and invest charitable work throughout the Prophetic Sunnah?

- How The Prophet peace be upon him dealt with the projects of the charitable work?

Therefore, the aim of the research was to achieve several goals, the most prominent of these goals was to know what was mentioned in the Prophetic Sunnah about the methods of developing charitable work, employing and directing the suitable energies in its investment. Accordingly, the research has achieved many important results, the most prominent of which are: Revealing the interest of the Prophetic Sunnah and its wide interest in charitable work in order of calling people for it, and the preaching of the Prophetic Sunnah to the development of ways and manifestations of charitable work and the coverage of its different kinds, and opening up the varied and integrated horizons of community care. Thus, the research has also clearly highlighted the great interest of the Prophetic Sunnah in methods that contribute to the development of charitable work, whether it is related to its people, to the work itself or to the environment in which charitable work is made
