Abstract

This study identifies what is meant by intellectual security as well as its significance and limitations. The various roles of universities are also identified as one of the most important educational institutions. This study also presents visions for the anticipated role of universities as an institution that shape the life of youth in their most delicate years when they want to absorb the concept of intellectual and academic freedom, and then transform it to reality and practical behaviour. student would enjoy practicing it as community service is considered to be one of the most important function for universities.

This study tries to presents a general preciption to the role universities can play in attaining intellectual security through discussing the different roles of higher education institutions including:

- Academic staff
- Curriculum
- University students
- Student activities

The study at the end provided a list of recommendations relative to the subject.
